DEPARMENT OF RADIO – DIAGNOSIS

Facilities

1.X – RAY - Whole Body X – RAYS (EG.Chest ,Skull, PNS, Foot ,Hand ,Abdomen , Shoulder, ARM, Elbow, Wrist, HIP, Spine, Knee,)

.X-RAY INVESTIGATION:-(a)Barium Swallow,(b)Barium Meal Follow Through,(c)Barium Enema,(d)IVP, (e)H.S.G (f)M.C.U,(g) R.G.U (h)Fistulogram).

2.MAMMOGRAPHY :-BY / LAT Mammography

3.USG:- Neurosonogram,neck,(thyroid scan),chest,abdomen and pelvis,scrotum,upper, and lower, limb arterial and venous Doppler,renal doppler. 1st and trimester anomaly scan, 3rd trimester scan with Doppler.

4.C.T.SCAN :- Brain, brain with angiography, neck, thorax, abdomen and pelvis, upper limb and lower limb scan, urography, knee joint, ankle joint, pulmonary angiography. (All the above scan plain and with contrast).

5.M.R.I. - Brain, brain angiography and venography, whole spine screening with detailing of cervical, dorsal and lumbar spine, shoulder joint, elbow joint, wrist joint, hand, hip joint, SI joint, abdomen and pelvis with MRCP, knee joint, ankle joint, foot. (All the above scan plain and with contrast).

RADIOLOGY DEPARTMENT OF INVESTIGATIONS

- (a) Barium Swallow,**
- (b) Barium Meal Follow Through,**
- (c) Barium Enema,**
- (d) IVP, (Intravenous Pyelogram)**
- (e) H.S.G (Hysterosalpingography)**
- (f) M.C.U, (Micturating Cystourethrogram)**
- (g) R.G.U (Retrograde Urthrography)**
- (h) Fistulogram).**
- (i) Colour Doppler**
- (j) Scrotom**
- (K) NT Scan**
- (l) Anomaly Scan**
- (m) B- Scan**
- (n) USG Guided**
- (o) CT- Guided**
