(Undergraduate Medical Education Board)

No. U-15024/19/2022-UGMEB

Dated : 21st Sept, 2022

PUBLIC NOTICE

National Medical Commission has published Compulsory Rotatory Medical Internship Regulations 2021 and Foreign Medical Graduate Licentiate Regulations 2021 in the official Gazette of India and the same have been made effective from the date of publication i.e. 18 Nov, 2021.

2. As per the clause 4(c) of Foreign Medical Graduate Licentiate (FMGL) Regulations 2021, *foreign medical graduates are required to undergo supervised internship in India for a minimum term of twelve months, after applying for the same to the Commission.*

3. As per the provisions of CRMI Regulations 2021, Foreign Medical Graduates who are required to do Internship in India, shall do the same only in medical colleges or institutions approved for providing CRMI to Indian Medical Graduates and the allocation of medical college to these FMGs will be done by the concerned State Medical Council only.

4. Further, Indian citizens (including overseas Indian citizens) who are Foreign Medical Graduates and do not fall under the purview of the National Medical Commission (Foreign Medical Graduate Licentiate) Regulations, 2021, shall be regulated by the provisions of sub-section (3) of section 13 of the Indian Medical Council Act, 1956 (102 of 1956) in accordance with the Advisory No MCI-203(1)(Gen)/2020- Regn./118239, dated the 2nd September, 2020 and are required to complete CRMI in India if they have not undergone such practical training after obtaining such qualification as may be required by the rules and regulations in force in the country granting such qualification or has not undergone any practical training in that country.

5. In order to implement the provisions of these Regulations, State Medical Councils are required to allot seats to FMGs, who have qualified FMG Exam, in medical colleges only. Foreign Medical Graduates may be posted first in colleges which have been newly opened and have yet to be recognized. A State-wise list of medical colleges/institutes which are approved/recognized by the Commission has already been shared with State Medical Councils vide UGMEB's letter dated 14.07.2022. **Accordingly, standalone PG institutes imparting DNB training under DNB-PDCET and non-teaching hospitals are not entitled to conduct Compulsory Rotatory Medical Internship after the publication of the NMC's CRMI Regulations, 2021.**

(Shambhu Sharan Kumar)
Director, UGMEB

(Undergraduate Medical Education Board)

No. U.15024/01/2022-UGMEB/

Dated the 9th May, 2023

CIRCULAR

Subject: Clarification regarding conduct of internship for FMGs – reg.

National Medical Commission is in receipt of representations/queries from various stakeholders including the State Medical Councils seeking clarifications on different issues regarding mode and method of conducting Medical Internship for Foreign Medical Graduates in India.

2. The issue has been carefully deliberated in the Commission and in consultation with Ministry of Health & Family Welfare through virtual meetings and it has been decided to consolidate all the guidelines/instructions issued by the Commission till date.

3. Further, the clarification in respect of the applicability of NMC's Notification dated 28.07.2022 regarding two years internship by FMGs, denial of internship by State Medical Councils on the basis of Domicile and completion of internship by FMGs in parts, is also required to be given in order to raise awareness among the various stakeholders and also the public at large. Thus, the following is clarified:

Important Provisions under CRMI Regulations 2021 for FMGs

- (i) Foreign medical graduates are required to undergo supervised internship in India for a minimum term of twelve months, after applying for the same to the Commission, as per the clause 4(c) of Foreign Medical Graduate Licentiate (FMGL) Regulations 2021.
- (ii) Foreign Medical Graduates who are required to do Internship in India, shall do so only in medical colleges or institutions approved for providing CRMI to Indian Medical Graduates and the allocation of medical college to these FMGs will be done by the concerned State Medical Council.
- (iii) The Internship shall be completed within two years of passing the final MBBS or Foreign Medical Graduate Examination (FMGE) or NExT Step-1 examination, whenever in force.

Contd.....2/-

- (iv) Foreign Medical Graduates may be posted to different medical colleges or institutions through a counseling or seat allocation process based on the merit;
- (v) The college or institution and its affiliated hospitals and Community Health Centres shall be recognized by the Commission for conducting the CRMI programme

Validation of Online study by Commission :

- (vi) The Commission has not approved/validated the medical qualifications (both theoretical & practical) through online mode only. However, during the Covid-19 pandemic, online classes conducted by Medical colleges/institutions in India were made valid, to be supplemented by practical and clinical training as per current curriculum in all MBBS subjects in the colleges/institutions and affiliated hospitals.
- (vii) Online study of medical qualification (theory alongwith practical) is not valid mode of study.

Applicability of NMC Public Notice dated 28.07.2022 on FMGs :

- (viii) In pursuance of order dated 29.04.2022 passed by the Hon'ble Supreme Court of India in SLP No. 2536-37 of 2022, NMC issued public notice dated 28.7.2022 informing that Indian students who were in the last year of their undergraduate medicine course but due to COVID-19, Russia-Ukraine war etc. had to leave their foreign medical institute and return to India and have subsequently completed their studies as also have been granted certificate of completion of course/degree by their respective institute on or before 30th June, 2022 shall be permitted to appear in Foreign Medical Graduate Examination.
- (ix) The provision of two years' internship, referred in Public Notice dated 28.07.2022, is applicable only to those Foreign Medical Graduates who were in their last year of their study of medical qualification and returned to India due to COVID-19 or Russia-Ukraine War etc. After successful completion of the medical qualification, such FMGs are required to qualify FMG Examination and subsequently undergo Compulsory Rotating Medical Internship (CRMI) for a period of two years (schedule of 12 months to be repeated) in hospital attached to medical college only.

Contd....3/-

- (x) All FMGs (Except covered in point (viii) and (ix) above) are required to complete their study from respective University/Institutes in offline mode or to supplement their online theory subjects/classes by offline practical and clinical training and thereafter shall acquire a valid medical qualification which is registrable in that country where it is being acquired. After qualifying FMG Examination, FMGs shall undergo Compulsory Rotating Medical Internship (CRMI) for a period of one year in accordance with CRMI Regulations 2021.

Requirement of Domicile by FMGs for internship :

- (xi) State Medical Councils shall not deny allotment of medical colleges for internship to FMGs on the basis of their domicile. An FMG can complete his/her internship from a medical college in any State/UT, if found eligible otherwise.

Completion of Internship by FMGs in parts at hospitals/medical colleges :

- (xii) In case, an FMG has already completed first one year of his/her internship in any medical college in India, he/she shall be free to complete remaining part of his/her internship(2nd year of internship) from another medical college/State/UT, as per the availability of seats for conducting internship for FMGs.

Payment of stipend to FMGs :

- (xiii) National Medical Commission vide Circular dated 19.05.2022, requested to all Directorates of Medical Education & State Medical Councils to ensure that no internship fee is charged by the medical colleges/institutes from these interns Indian and Foreign Medical Graduates and stipend including other facilities is being provided to FMGs as equivalent to Indian Medical Graduates in the States/UTs.
- (xiv) However, considering the requests/representations from various State Governments/UTs/medical colleges wherein it was intimated that there has been no budgetary provision in their allocation of annual budget to provide stipend to Foreign Medical Graduates, the Commission vide circular dated 19.10.2022 has already clarified that the amount of stipend to be paid to the interns is to be decided/fixed by the appropriate authority applicable to the Institution/University or State. The implementation of these guidelines/instructions/advisory is solely at the discretion of the concerned State authorities under which the medical college/institute is located.

Contd.....4/-

- (xv) However, stipend is payable to FMG interns only during 2nd year of internship, as one year is in lieu of the missed clinical training during MBBS course in Foreign Medical College/Institute.

One-time Relaxation to Foreign Medical Graduates to complete Internship :

- (xvi) A number of requests/queries received from different State Medical Councils regarding non-availability of seats for FMGs to start their internships at their State/UT especially due to the implementation of the two years' internship for FMGs. Their request has been considered in National Medical Commission favourably in the Coordination Meeting of Chairman, NMC with Presidents and Members of the four Boards of NMC held on 2nd May 2023.
- (xvii) After careful consideration of the situation and issue faced by the FMGs in order to explore seats to complete their internship, it is decided by UGMEB to validate the list of Recognized Non-teaching Hospitals for Compulsory Rotating Medical Internship issued by the erstwhile Medical Council of India, for a period of one year from the issue of this circular i.e. upto May 2024, for conduct of internship for Foreign Medical Graduates only. List of Recognized Non-teaching Hospitals for Compulsory Rotating Medical Internship issued by the erstwhile Medical Council of India is at **Annexure**. This relaxation is granted only as a one-time measure.
- (xviii) The allotment of FMGs in these Non-teaching Hospitals shall also be done only through concerned State Medical Councils.

4. All State Medical Councils and Directorates of Medical Education are requested to kindly ensure the implementation of the above guidelines/instructions while allocating medical colleges to Foreign Medical Graduates.

(Dr. Aruna V. Vanikar)
President, UGMEB

Dear Sir/Madam,

Myself Piyush Purushottamrao Dahikar graduated from Osh State University,
Medical Faculty, Kyrgyzstan in June 2022 and passed FMGE in Dec 2022/Jan
2023.

Maharashtra Medical Council has allotted PDMMC, Amravati to me for doing
CRMI. So, as per above stated subject I want to do internship in your college
and writing application for the same.

Please think on my request and grant me permission to do internship in PDMMC,
Amravati.

Yours Sincerely,

Piyush Purushottamrao Dahikar

DEPARTMENT OF PHYSIOLOGY

Pdmmc/Physiology/464/2023

Date-15/02/2023

Activity (Event) Report

Project/Activity/Event Name: Lecture on "Intellectual property rights"

Venue/Place:- Guyton Hall, Dr. PDMMC, Amravati **Department/Section:-** MEU.

Date of event/activity/project: 13th February 2023 **Time:-** 10.30 am -11.30 am

Objectives:

- 1) To promote innovation, creativity and empower individuals from creation of human mind to benefit all
- 2) Introduction to concept of intellectual property rights and patents.

Importance/Relevance/Introduction: Lecture focused on concept of creation, applying for patents and copyrights, publication and its distribution in clinical research.

Brief description of the activity carried out: Lecture covered topics on copyrights, patents, trademarks, trade names and laws related to intellectual property rights.

Recommendations: Intellectual property rights for research in medical college are much needed and such lectures/ workshops must be regularly arranged and encouraged to benefit the researchers from clinical background.

Programme Report

Programme Name: MOU between Dr. Panjabrao Deshmukh Memorial Medical College Hospital & Siddharth Gupta Memorial Cancer Hospital Wardha

Period of Programme : From April 2023 for 2 Years

Objectives:

1. Provide Management services in the form of radiation Therapy to the cancer patients from Dr. Dr. Panjabrao Deshmukh Memorial Medical College Hospital Amravati

Programme activity:

1. Dr. Panjabrao Deshmukh Memorial Medical College Hospital. PDMMCH will refer cancer patients requiring radiation therapy.
2. Siddharth Gupta Memorial Cancer Hospital Wardha will provide therapy to the patients from Dr. Panjabrao Deshmukh Memorial Medical College Hospital Amravati on Priority Basis

INTRODUCTION

Diabetes Mellitus is a chronic disease that occurs either when the pancreas does not produce enough insulin or when the body cannot effectively use the insulin it produces. Insulin is a hormone that regulates blood glucose. Hyperglycemia, also called raised blood glucose or raised blood sugar, is a common effect of uncontrolled diabetes and over time leads to serious damage to many of the body's systems, especially the nerves and blood vessels.

In 2014, 8.5% of adults aged 18 years and older had diabetes. In 2019, diabetes was the direct cause of 1.5 million deaths and 48% of all deaths due to diabetes occurred before the age of 70 years. Another 4,60,000 kidney disease deaths were caused by diabetes, and raised blood glucose causes around 20% of cardiovascular deaths (1). Between 2000 and 2019, there was a 3% increase in age-standardized mortality rates from diabetes. In lower-middle-income countries, the mortality rate due to diabetes increased 13%. By contrast, the probability of dying from any one of the four main noncommunicable diseases (cardiovascular diseases, cancer, chronic respiratory diseases or diabetes) between the ages of 30 and 70 decreased by 22% globally between 2000 and 2019.

Type-2 Diabetes Mellitus

Type-2 diabetes (formerly called non-insulin-dependent, or adult-onset) results from the body's ineffective use of insulin. More than 95% of people with diabetes have Type-2 diabetes. This type of diabetes is largely the result of excess body weight and physical inactivity. Symptoms may be similar to those of Type-1 diabetes but are often less marked. As a result, the disease may be diagnosed several years after onset, after complications have already arisen. Until recently, this type of diabetes was seen only in adults but it is now also occurring increasingly frequently in children.

Type-1 Diabetes Mellitus

Type-1 diabetes (previously known as insulin-dependent, juvenile or childhood-onset) is characterized by deficient insulin production and requires daily administration of insulin. In 2017 there were 9 million people with Type-1 diabetes; the majority of them live in high-income countries. Neither its cause nor the means to prevent it are known. Symptoms include excessive excretion of urine (polyuria), thirst (polydipsia), constant hunger, weight loss, vision changes, and fatigue. These symptoms may occur suddenly.

Gestational Diabetes Mellitus

Gestational diabetes is hyperglycemia with blood glucose values above normal but below those diagnostic of diabetes. Gestational diabetes occurs during pregnancy. Women with gestational diabetes are at an increased risk of complications during pregnancy and at delivery. These women and possibly their children are also at increased risk of Type-2 diabetes in the future. Gestational diabetes is diagnosed through prenatal screening, rather than through reported symptoms.¹

Statement of Problem :-

Today 10.5% of the globe adult population suffers from diabetes in next years this number is expected to rise to over 12% due to Less physical activitie unhealthy eating habits and spending too much time in front of computer etc. S with respect to the problem an attempt is being made and on behalf of research scholar's keen interest primarily to see effect of yogic asanas on diabetic patients and secondary effect of walking on diabetic patients so the problem is stated as "**EFFICACY OF ASANA AND WALKING ON DIABETIC PATIENT**".

Purpose of Study:-

¹ <https://www.who.int/news-room/fact-sheets/detail/diabetes>

The purpose of the study is to find out the efficacy of selected asanas and walking in management of diabetic patients also to check the correlation between selected variables.

To assess the blood glucose level of patients under medical experts via laboratory **Blood Glucose and HbA1c Test.**

Significance of the study :-

The Study will be significance in following way :-

- 1) Walking help to develop cardiovascular endurance and also helps to decrease Blood Glucose Level that is helps to control hyperglycemia.
- 2) The study will helps to reduce or maintain BMI.
- 3) The study will help to control and if practices for long duration it may reverse the Type-2 Diabetes which may leads to stop taking tablets.
- 4) The study will also helpful to Medical Experts in prescription to person who is under training schedule also helpful to Yoga Teacher, Trainers to prepare the training schedule for Diabetic Patients.

Hypothesis :-

On the basis of literature discussion with expert's and Scholar's own understanding it is hypothesized that,

H1 – There will be efficacy of asana on diabetic patients.

H2 - There will be efficacy of walking on diabetic patients.

H3 - There will be significant relationship between asana and walking training on Diabetic Patients.

Delimitation :-

The scope of the study will be on the following points

- 1) The research will be delimited to Type-2 Diabetic Patients.
- 2) The age will be ranging from 25 to 80 years from Amravati Region only.
- 3) The duration of the daily practice will be 45 minutes.
- 4) The asana will be practiced 5 times in week.
- 5) The walking will be practiced 5 times a week.
- 6) Asana and walking will be practice in the morning session.

Limitation :-

- 1) There will be no control on diet but they will be motivated to follow healthy and low calories diet.
- 2) External factors like daily routine, personal addiction, climatic condition and attitude will not be taken into consideration.
- 3) Psychological and economic condition of the subject will be limited to the research scholar.

Definition of the Terminologies :-

Diabetes Mellitus

Diabetes is a disease caused by a failure of glucose homeostasis. There are two forms :

Type-1 diabetes, once known as juvenile diabetes or insulin-dependent diabetes, is a chronic condition. In this condition, the pancreas makes little or no insulin. Insulin is a hormone the body uses to allow sugar (glucose) to enter cells to produce energy. Different factors, such as genetics and some viruses, may cause Type-1 diabetes. Although Type-1 diabetes usually appears during childhood or adolescence, it can develop in adults. Even after a lot of research, Type-1 diabetes has no cure. Treatment is directed toward managing the amount of sugar in the blood using insulin, diet and lifestyle to prevent complications.²

² <https://www.mayoclinic.org/diseases-conditions/type-1-diabetes/symptoms-causes/syc-20353011>

Type-2 diabetes, the most common type of diabetes, is a disease that occurs when your blood glucose, also called blood sugar, is too high. Blood glucose is your main source of energy and comes mainly from the food you eat. Insulin, a hormone made by the pancreas, helps glucose get into your cells to be used for energy. In Type-2 diabetes, your body doesn't make enough insulin or doesn't use insulin well. Too much glucose then stays in your blood, and not enough reaches your cells. The good news is that you can take steps to prevent or delay the development of Type-2 diabetes.³

Asana

According to tradition, there are eighty-four lakh asanas, but today no one knows all eighty-four lakh asanas. Of these, eighty-four are the main asanas, whose education is given in the society today. After purification, asanas are practiced for physical stability and firmness. Here firmness also means the stillness of the body. In the practice of asanas it should be remembered that asana is a position of the body. When we can stay comfortably in one position of the body for a long period of time without any tension without any physical pain, then that position is called Asana.

The definition of asanas has also been given in the Yoga Sutras '**Sthira Sukhmasanam**', the physical position in which you can remain stable and experience happiness, that is asana. From the point of view of teaching, asanas are divided into two parts - dynamic asanas and stationary asanas. Initially, to bring your body under control, dynamic asanas are practiced to make the body flexible. When we try to keep our body in a stable posture for a long period of time, pain and tension in the muscles of the body arise, due to which there is a position of deflection; There is trouble and sorrow, which is not the goal of the asanas. After the dynamic asanas, as the capacity of our body increases, in the same way we start the practice of static asanas. The practice of asanas has some subtle effects on the body. There is a change in the process of respiration. With

<https://www.niddk.nih.gov/health-information/diabetes/overview/what-is-diabetes/type-2-diabetes>

practice one gets used to taking slow and deep breaths, this helps in achieving mental and emotional balance.

The first purpose of asanas is to free us from physical and mental sufferings. Asanas also make the joints of the body flexible. They make the muscles healthy by creating tension from the muscles of the body and throw out the toxic elements from the body. Asanas create harmony in the functioning of the nervous system and increase the efficiency of the internal organs of the body by light massage. In this way gradually the body becomes healthy.⁴

Walking

Walk is a verb that means to move at a moderate pace with the feet. A walk is a period of time spent walking. Walk can also mean to help someone walk or to cause something to walk. Walk has many other senses as a noun and verb. Walk is also used in several idioms.

When you walk, you stand upright and put one foot in front of the other at a normal pace. Normally, when most people want to move from place to place, they walk. We also use walk to describe the movement of animals with more than two legs that alternate feet as they move. For example, you could say that your cat walked across a street.

Real-life examples: It is a major life stage when toddlers learn how to walk. You might walk to the store to buy food. Cities are full of people walking on the sidewalks. Used in a sentence: My foot hurts so badly that I can barely walk. Related to this sense, a walk is a period of walking done for exercise or entertainment. Used in a sentence: I got so angry that I had to take a walk to cool down. Walk can also mean to cause something (usually an animal) to walk. When referring to people, walk means to help someone walk or to join them on

⁴ Gherand Samhita Commentary on yoga education of Maharishi Gherand Author-Swami Niranjananand Saraswati, Golden Jubilee Publications 2013 Yoga Publications Trust, Munger, Bihar, India

a walk. Used in a sentence: Tamica walked her elderly neighbor across the busy intersection.⁵

CHAPTER -2

A review of some selected studies and their findings - relevant to the present research is attempted in this chapter. "The literature in field forms is the foundation upon which all future work will be built" Agarwal, (1975). Such a

⁵ <https://www.dictionary.com/browse/walk>

review brings about a deep insight and a clear perspective of the overall field. As of now, only a few research studies have been carried out in this area of improving or devising new training methods to produce high level of performance in players of games. The investigator presents the following relevant literature, which he has gone through as the background for this study.

Dr. P.H. Rohankar, Dr. M.W. Jagtap, S. A. Kale Conducted study observing the effect of swimming, Cycling, Walking and yoga Exercise on Blood Glucose with diabetes mellitus patients. The Method Used: The blood samples were collected from the diabetic patients, after separation of plasma the samples tested for Blood glucose before and after Exercise after Suggestion of exercise for three months of patients we found the result GOD –POD colorimetric method (Glucose kit method) and the result confirmed by Automatic Analyzer and pooled Statistically. The Principle Result: All exercises shown to have significant impact on Blood glucose for diabetes mellitus the four methods employed for patients under study table 1,2,3,4. Equal number of healthy controls age matched is also shown in table 1,2,3,4. Swimming is 0.75% Cycling is 0.77% Walking is 0.85% and Yoga is 0.92 % Walking and yoga Exercise are more significant as compared to the swimming and cycling Exercise and lead to develop proper glucose control.⁶

In this case study Satarupa Dash, Atanu Kumar Thakur conducted a study to understand effect of yoga in Type-2 diabetics. The study is conducted on outdoor patient basis at Dept. of physiology V.S.S Medical College Burla with the help of department of Medicine and yoga centre, Sambalpur. Sixty patients with Type-2 Diabetes Mellitus (NIDDM) were divided into two separate groups. Group I (n1 = 30) patients belonged to the Yoga group were put through various Yogic asana for 40 days, together with diet plus diabetic medicines. Group II (n2 = 30) patients or the control group patients, were retained on diet

plus normal medical therapy. The basal parameters included in the biochemical investigations are FBG, PPBG, HbA1C and lipid profile. Data related to biochemical tests were analysed by using SPSS programme version of 16.0 software facilities in the computer. From the statistical analysis of the results obtained in the present study and their comparison with other published reports, it may be concluded that yoga helps in decreasing blood sugar level and keep the diabetes in control. So also the reduction in HbA1C protects the patients from early development of various microvascular and macrovascular complications of diabetes mellitus. The change in lipid profile status prevents the early development of comorbid condition like hypertension, coronary artery disease. It can be concluded that yoga asana and pranayama may be used as an adjunct to medical therapy to optimize the biochemical parameters. Yoga therapy also improves the status of diabetics in terms of reduction of drug doses, physical and mental alertness and prevention of complications.⁷

Sandeep Kaur, Kirandeep Kaur, Shalu Rai, Rajat Khajuria studied Oral health management considerations in patients with diabetes mellitus. Long-term consequences of hyperglycemia are very heterogeneous and affect partially all tissues and organs of the organism. A number of oral diseases and disorders have been associated with DM, and periodontitis has been identified as a possible risk factor for poor glycemic control and the development of other clinical complications of diabetes. In this review article, we discuss the relevant information about DM associated oral conditions and role of dental practitioners to take the responsibility to develop programs to educate the public about the oral manifestations of diabetes and its complications on oral health in order to promote proper oral health and to reduce the risk of oral diseases.⁸

Ranasinghe, Priyanga, Chathuranga, Tharindu, Atapattu, Piyusha Milani, & Misra, Anoop in 2018 studied The benefits of yoga practice compared to physical exercise in the management of Type-2 Diabetes Mellitus: A systematic review and meta-analysis. The present study aims to systematically evaluate the literature and perform a meta-analysis on the effects of yoga practice compared to physical exercise in the management of T2DM. Data were obtained using a stepwise search process using keywords in the following online medical databases; PubMed, Web of Science and Scopus. All controlled clinical trials involving patients with T2DM, comparing yoga as an intervention with physical exercise and evaluating glycemic control and other outcomes between the intervention and control groups were included in the analysis.⁹

CHAPTER -3

METHODOLOGY

3.1. Sources of Data

For the present study data, the type-2 diabetic patients will be source of data.

⁹ Jayawardena R, Ranasinghe P, Chathuranga T, Atapattu PM, Misra A, The benefits of Yoga Practice compared to Physical Exercise in the Management of Type-2 Diabetes Mellitus: a Systematic Review and MetaAnalysis, Diabetes and Metabolic Syndrome: Clinical Research and Reviews (2010), <https://doi.org/10.1016/j.dsx.2018.04.008>

3.2. Selection of Subjects

Male are selected from Amravati region for this study the age of the subject will be ranged from 25-80 years.

3.3. Sampling Procedure

Purposive sampling method will be adopted for the selection of subjects for the present study.

3.4 Selection of variables

1. Blood glucose levels during fasting.
2. Blood glucose levels Postprandial (Post Meal).
3. Glycated Hemoglobin (HbA1c)

3.5 Selection of Test and Criterion Measures

Standard Glucose Level :- Fasting: ≥ 100 mg/dl Postprandial: ≥ 140 mg/dl

For Diabetic Patients :

- > Fasting Glucose Level :- ≥ 126 mg/dl (7.0mmol/l)
- > Postprandial Glucose Level :- ≤ 200 mg/dl (11.1 mmol/l)
- > Hb1Ac Test :- Below 5.7% is normal, between 5.7 and 6.4% indicates you have prediabetes, and 6.5% or higher.¹⁰

3.6 ADMINISTRATION OF THE TEST

3.6.1. Name of the test :- Blood Glucose Test

Name of Equipment :- Glucometer [Make- Accu-chek Active (Validity-0.99 Realibility-0.98)]¹¹

¹⁰ <https://diabetes.org/diabetes/a1c/diagnosis>

¹¹ <https://www.accu-chek.in/meter-systems/active-0>

Purpose of the study :- To determine the Blood Glucose Level during fasting and Postprandial (Post Meal).

Procedure of the Test:-

- 1) Wash and dry your hands well.
- 2) Insert a test strips into your meter.
- 3) Prick the side of your fingertip with the needle (Lancet) provided with your test kit.
- 4) Touch and hold the edge of the test strip to the drop of blood.
- 5) The meter will display your blood sugar level on a screen after a few seconds.¹²

3.6.2. Name of the test :- HbA1c Test

During the A1C test, a member of your health care team takes a blood sample by inserting a needle into a vein in your arm or pricking your finger tip with a small, pointed lancet. If the blood is taken from a vein, the blood sample is sent to a lab for analysis.¹³

3.7 Collection of Data:

These data will be collected via applying above tests.

3.8 Tabulation and Statistical Treatment:

The collected data will be arranged systematically in the table for further analysis and interpretation.

¹² <https://www.mayoclinic.org/diseases-conditions/diabetes/in-depth/blood-sugar/art-20046628#:~:text=insert%20a%20test%20strip%20into,screen%20after%20a%20few%20seconds.>

¹³ <https://www.mayoclinic.org/tests-procedures/a1c-test/about/pac-20384643#:~:text=During%20the%20A1C%20test%2C%20a,to%20a%20lab%20for%20analysis.>

3.9 Administration of Trainings

Practice Schedule will be structured by Experts.

(Component of Asanas- Prayer, Uttanapadasan, Naukasana, Vajrasana-
Yogmudra, Vakrasana, Ardhamachhindrasana, Dhanurasana, shalabhasana,
Bhujangasana, Pawanmuktasana, Trikonasna, Ardhakatichakrasana,
Mandukasana, Padhastasana, Utrashana, Mattyasana, Triyak Tadasana, Triyak
Bujangasana, Simhasana, Shavasana, Om-chanting.)

CHAPTER IV

ANALYSIS AND INTERPRETATION OF DATA

In this chapter, Analysis of data and interpretation of the results will be presented under the following headings Statistical treatment Level of significance, Findings, Discussion on findings and Testing of hypothesis.

4.1 Statistical Treatment

To determine the significant difference in the selected variables of the subject due to asana and walking ANOVA (Analysis of variance) will be statistical technique will be employed. To find the relationship Person Product-moment correlation statistical tool will be employed.

4.2 Level of Significance

To test the hypothesis, level of significance will be chosen at 0.05 which is considered appropriate for the present study.

CHAPTER V

SUMMARY CONCLUSION AND RECOMMENDATIONS

5.1 Summary

The summary of the whole study will be written and on the basis of statistical findings conclusion will be drawn. Based on the summary and conclusions, recommendation will be made for further studies.

5.2 Conclusion

On the basis of statistical findings following conclusions will be drawn.

5.2.1 Significant scores could be found in diabetic patients due to asana .

5.2.2 Significant scores could be found in diabetic patients due to walking

5.2.3 Significant correlation between diabetes and walking.

5.2.4 The results may show higher scores of asana. (Both group).

5.3. Recommendation

On the basis of findings and conclusion the researcher made following recommendations.

5.3.1 Similar study may be conducted by using different asana or by changing intensity of walking.

5.3.2 Similar study may be undertaken by selecting to particular age, sex and sports activities other than those employed in this study.

Programme Report

Programme Name: MOU between Dr. Panjabrao Deshmukh Memorial Medical Amravati, Hospital & Research Centre and City Tuberculosis Officer, Amravati Municipal Corporation, State Health Society

Period of Programme : From Feb. 2022

Objectives:

1. Implementation of RNTCP for the patients from Dr. Panjabrao Deshmukh Memorial Medical Amravati, Hospital & Research Centre Amravati
2. Provide Diagnostic Services in the form of Molecular detection of M. Tuberculosis and Rif Resistant M. tuberculosis.

Programme activity:

The OPD & Indoor patients of Dr. PDMMC Amravati are investigated. Molecular detection of M. tuberculosis and Rif resistant M. tuberculosis in the samples received (Pulmonary/ Extra Pulmonary) is done by TRUNAT PCR (Molbio) . Data is maintained as per the formats provided and shared with the RNTCP centre at Bhajee Bajar Amravati.

Enclosures:

1. Copy of Monthly Record of the tests carried out.
