**Report on the teaching Sessions carried out on the relevance and operational features of the Immunization Clinic**

1. The awareness program about Vaccines and general information as per WHO guidelines commences from the Orientation course of Students admitted to First year of MBBS course.
2. The students are shown the immunization Clinic at the OPD and the routine functioning of it.
3. During the III and IV Semester, small group teaching is conducted wherein orientation to the Immunization in children, the Immunization Schedule, Cold chain and maintenance of Vaccines at the clinic is explained to the students. In addition, during theory didactic lectures and clinical postings they are initiated to the theoretical aspects of vaccines, Immunization Schedules, conduct of vaccination sessions.
4. At the V and VI Semester level during clinical posting further details about Individual Vaccines, adverse effects, Schedule and contraindications of vaccines are reinforced.
5. The sister i/c of the clinic, briefs the students about • the techniques of administering various vaccines • Proper handling of vaccines • Precautions to be taken. • Demonstration of vaccine delivery (Oral, i/m, s/c,i/d ) • Importance of cold chain • Documentation • Indenting procedure and accountability
6. Interns posted in Pediatric department during their clinical rotation posting are exposed to immunization clinic. They are taught about immunization schedule both routine and optional, storage of vaccine, administration of vaccines and how to observe and manage adverse events following immunization.
7. Interns observe the immunization of various vaccines. They are taught about ILR and Cold chain. They are also trained for maintenance of various records like temperature record of ILR, stock book, adverse events etc.
